10982 Supporting and Troubleshooting Windows 10

Course Overview

This course is designed to provide students with the knowledge and skills required to support and troubleshoot Windows 10 PCs and devices in a Windows Server domain environment. These skills include understanding of Windows 10 features, how they can be used in an Active Directory environment and how to troubleshoot them.

Who Should Attend

The primary audience for this course is the Enterprise Desktop Support Technician (EDST), who provides Tier 2 support to users running Windows 10 personal computers (PCs) and devices in medium to large enterprise organizations, within a Windows domain environment. EDSTs focus on a broad range of technical issues for Windows operating systems (OSs), devices, cloud services, applications, networking, and hardware support. In the overarching scenario, if an Enterprise offers the service, the EDST is asked to support it.

The key responsibilities include resolving technical issues pertaining to Windows 10 installation and migration, activation, performance, profiles, settings; and device synchronization. Some other key responsibilities include local and remote network access; access to applications, access to data and printers; authentication, Endpoint security and policy; OS and data recovery.

Course Objectives

After completing this course, students will be able to:  
- Describe the processes involved in planning and using a troubleshooting methodology for Windows 10.  
- Troubleshoot startup issues and operating system services on a Windows 10 PC.  
- Resolve issues that pertain to hardware devices and device drivers.  
- Troubleshoot Windows 10 devices remotely.
