

CNS-420 Citrix Networking Assessment, Design, and Advanced Configuration

Course Overview

[View Course Dates & Register Today](#)

This is a 5-day class

In this expert level 5-day training course you will be exposed to advanced networking and Citrix ADC concepts and configurations. Through lecture, lab exercises, and real-world case studies, you will learn to look critically at environment requirements, constraints, and business drivers to create a complex Citrix networking solution.

Topics to be covered in this course include multi-site and multitenant deployments, advanced authentication and load balancing, and automation and orchestration and advanced troubleshooting. This training will also prepare you for the Citrix Certified Expert in Networking (CCE-N) exam. Note: This course provides one free exam voucher upon completion of training.

Who Should Attend

Built for IT Professionals with extensive networking and Citrix ADC experience. This course is built for IT Professionals who are responsible for defining the overall structure or architecture of a Citrix networking environment. This course encompasses advanced Citrix networking configurations and leading Citrix design principles.

Course Objectives

- How to identify and prioritize business drivers, constraints, and requirements using the Citrix Consulting methodology
- Assess environment requirements and learn to apply leading design principles to address them in a multi-site Citrix ADC deployment
- Apply advanced authentication and load balancing principles

Course Outline

1 Networking Methodology and Assessment

Understanding the Citrix methodology
Business Drivers and Requirements
User Segmentation
Application Assessment
Capabilities Assessment

2 Citrix Networking Deployment Architecture and Topology

Multi-Site Deployments
Multi Tennant Infrastructure
Cloud Deployments
High Availability
Citrix ADC Double-Hop Scenarios
Secure Web Gateway

3 Advanced Authentication and Authorization

Authorization Policies
Access Policies
Advanced Authentication Options
Multi-Factor Authentication
nFactor Authentication
AAA Session Management

CNS-420 Citrix Networking Assessment, Design, and Advanced Configuration

4 Citrix ADC Security

- Authorization
- Pre-authentication and Endpoint Analysis Scans
- Protection against Layer 4-7 Attacks
- Web App Firewall

5 Citrix Gateway Configuration Considerations

- ICA Proxy Configuration
- VPN Access
- Clientless Access
- Split Tunneling
- RDP Proxy Deployment and Configuration

6 Advanced Load Distribution and Link Load balancing

- Advanced Load Balancing
- Advanced Load Balancing
- Link Load Balancing
- Firewall Load Balancing
- Microsoft Exchange Load Balancing
- Advanced Global Server Load Balancing\
- Global Server Load Balancing Persistence
- DNS, Policies, Expressions, Actions, and Views
- GSLB Monitoring and Considerations

7 Application Delivery Management Automation and Orchestration

- Application Delivery Management Outbound Traffic Dashboard
- Automation
- Orchestration
- Configuration Jobs
- Configuration Audit
- NITRO API
- StyleBooks (Net-new)
