

Power BI: Dashboard In a Day

Course Overview

[View Course Dates & Register Today](#)

This is a 1-day class

Students will discover the full capabilities of Power BI in a one-day, hands-on workshop. Please Note: This workshop is primarily self-directed and students will work at their own pace while having access to an instructor for questions.

Who Should Attend

The Power BI in a Day course is designed for beginners and intermediate users of Power BI.

Course Objectives

- Knowledge of how to get started with using Power BI for Analytics
- Gain confidence in building and servicing basic Power BI solutions for your organization
- Understand how to connect, import, and transform data from a variety of sources
- Enabling a culture of self-serve BI throughout the organization
- Better understand how to explore data with powerful visualization tools to build stunning reports
- Understand how to share dashboards with your team and publish them to the web
