

Office 365 Online Getting Started with OneNote Online

Course Overview

This course introduces OneNote Online, a versatile application perfect for taking notes, making to-do lists, or organizing any kind of content. Students will learn how to create and add content to a notebook, how to organize it into different sections and pages, and how to share notebooks with others.

Who Should Attend

This course is suited to beginners to the Microsoft Office suite. It is helpful to have an understanding of the online Office 365 interface, but no prior knowledge of OneNote or any other applications is necessary. Whether you have never opened a Word document or are writing VBA code in Excel, you will learn valuable organizational skills and the benefits of always having a notebook on hand.

Course Objectives

This course is meant to teach students how to expertly gather and organize information from different sources and for various purposes. You will learn how to create notebooks and structure them according to your needs, how to add your own content or take notes on other sources, and how to share notebooks with other users. By the end of this Power Hour, you will be ready to learn more advanced features in OneNote as well as how to use OneNote alongside other applications.

Other Prerequisites

Basic computer skills
