

Certified in Risk and Information Systems Control (CRISC)

Course Overview

The CRISC course is designed for those who have experience with risk identification, assessment, and evaluation; risk response; risk monitoring; information systems control design and implementation; and information systems control monitoring and maintenance.

Who Should Attend

The CRISC Online Review Course is an online preparation course that will prepare you for the CRISC certification exam using proven instructional design techniques and interactive activities. The course covers all four of the CRISC domains. The course incorporates video, interactive eLearning modules, downloadable, interactive workbooks, downloadable job aids, case study activities, and pre- and post-course assessments. You will be able to navigate the course at your own pace, following a recommended structure, or target preferred job practice areas. You may also start and stop the course based on your study schedule, picking up exactly where you left off the next time you access.

Course Objectives

The CRISC credential is intended for risk and control professionals, including:

- IT professionals
- Risk professionals
- Control professionals
- Business analysts
- Project managers
- Compliance professionals

Course Outline

1 Introduction to IT Risk Management

Governance and Risk management
The Context of IT Risk Management
