

# MB-200T00-A Microsoft Power Platform + Dynamics 365 Core

## Course Overview

The Microsoft Power Platform helps organizations optimize their operations by automating routine tasks and standardizing best practices. This training provides a high-level overview of the capabilities of Microsoft Dynamics 365 and the Power Platform and provides a foundation for other Microsoft Dynamics 365 and Power Platform training offerings. High-level topics include application configuration, automation opportunities, integration, testing, and deployment.

This is a 5-day class

## Who Should Attend

A Dynamics 365 Customer Engagement Functional Consultant is responsible for performing discovery, capturing requirements, engaging subject matter experts and stakeholders, translating requirements, and configuring the solution and applications. The Functional Consultant implements a solution using out of the box capabilities, codeless extensibility, application and service integrations.

## Course Objectives

After completing this course, you will be able to:

- Identify platform components.
- Understand administrator options.
- Effectively model data.
- Build a basic model-driven or canvas application.
- Identify testing strategies and methodologies.
- Identify integration opportunities.

## Course Outline

### 1 Power Platform overview

Overview  
Configure Power Platform environments  
Creating applications  
Discovery and planning

### 2 Data Modeling

Data model fundamentals  
Relationships  
Other entity options  
Other field options  
Internationalizing

# MB-200T00-A Microsoft Power Platform + Dynamics 365 Core

## 3 Model-driven apps

- Configure model-driven apps
- Configure model-driven forms
- Configure views
- Configure model-driven charts
- Configure model-driven dashboards
- Configure reports

## 4 Canvas apps

- Application fundamentals
- Working with data and services
- Customizing the user experience
- Integration with model-driven apps

## 5 Security

- Security overview
- Business units
- Manage security roles
- Manage teams
- Configure hierarchy security

## 6 Platform Automation Overview

- Automation overview

## 7 Business Rules

- Introduction to business rules
- Additional business rule details

## 8 Workflows

- Introduction to workflows
- Building workflows
- Advanced workflow

## 9 Microsoft Flows

- Introduction to Microsoft Flow
- Other flow concepts
- Working with CDS
- Building approval flows
- Starting from apps
- Flow deployment considerations

## 10 Business Process Flows

- Introduction to business process flows
- Configure business process flows
- Additional business process flows details

## 11 Introduction to integrations

- Overview of common scenarios
- Email integration
- Outlook integration

# MB-200T00-A Microsoft Power Platform + Dynamics 365 Core

## 12 Integration with Office

- Templates
- SharePoint
- Microsoft Teams
- Additional Integrations

## 13 Managing Data

- Managing data overview
- Duplicate detection
- Importing data
- Exporting data
- Bulk delete

## 14 Manage Instances and Applications

- Overview
- Manage applications

## 15 Manage Solutions

- Solution concepts
- Planning and creating solutions
- Working with solution components
- Distributing solutions
- Working with managed solutions

## 16 Additional Deployment Considerations

- Configure
- Mobile configuration settings
- Mobile configuration
